

ESTHETICS
ON THE ROCKS
SANTORINI

1ST INTERNATIONAL
SYMPOSIUM **SANTORINI**

2-5 OCTOBER, 2019

DG&Z

DEAR COLLEAGUES

The place for our aesthetic congress could not be any better: the idyllic fusion of sea and volcano rocks, merging in the play of light to create a magnificent example of the beauty of nature.

Santorini is considered to be aesthetically a total work of art perfected by man-made architecture and coloring – freely adapted to the definition of the philosopher Eisler that aesthetics satisfies the desire to observe.

This is to serve as theme and motivation for our passion for aesthetic dentistry: to restore the beauty of nature using our manual skills and senses, to improve and complete it according to the recent esthetic perceptions and knowledge.

We invite you to be part of this congress, be inspired by the aesthetics of the island of Santorini and its unlimited shades of white. Excellent speakers and a variety of topics – resulted out of a great cooperation of three European Academies of Aesthetic Dentistry in the composition of the scientific program – will also enthuse you.

Dr. Georgia Trimpou
vice president of the DGÄZ

In cooperation with

The 1st International Symposium is a joined scientific event with the 15th International Congress of the Hellenic Academy of Esthetic Dentistry.
